SUMMARY

I am a highly efficient and reliable professional developer who possesses a broad skill set for web development. I always get great reviews from the client as I put the good relationship with him first and focus on speed and quality in development. Satisfying him is my motto by understanding his intention promptly and accurately and making good suggestions.

EXPERIENCE

Full Stack Developer

Galatismiles

2021 - 2022

- Took a leading role in introducing new technologies within new projects and existing ones.
- Created new applications from proof of concept to regular apps and made decisions regarding tooling in the front end.
- Analyzed client requirements and maintained multiple production applications.
- Created complex messaging system for an existing application.

Blockchain Developer

Criptolegion

2019 - 2021

- Developed secure Solidity smart contracts for the Ethereum blockchain.
- Conducted security audits of Solidity smart contracts.
- Implemented interaction with Ethereum smart contracts using JavaScript and web3.
- Acted as token economics consultant.
- Worked on picking the correct blockchain technology for the client's needs.
- Developed prototype smart contracts on Ethereum, using Solidity.
- Contributed to software written in Go which interacts with Ethereum nodes (with geth nodes specifically).

React Developer

Freelance work

2017 - 2019

- Developed a full SPA with React, React Router, and Redux.
- Worked with highly complex forms, maps, and interactive visualization of results.
- Performed queries with algolia, working with their SDK and creating an autocomplete component to show the results.
- Developed a mechanism to mutate the state with Redux in a way that it doesn't cause any side effects and allows time travel debugging.
- Created custom website layouts using HTML, CSS, and Bootstrap integrated into the React framework.
- Handled card payment integration for various subscriptions and product purchasing functionalities.

TECH STACK

React

Next.js

Typescript

Vue

Vutify

Smart Contract

Solidity

Web3

Ethereum

Django

Laravel

PHP

Python

Javascript

HTML

CSS

Node

Express

Mongodb

Postgresql

Firebase

STRENGTHS

Good relationship with client

Pay attention to his attitude and intention

Hard-working

To satisfy my client by finish the project in a short time and to the highest quality.

Solving complex problems

Due to my occupational characteristic and hobby.

EDUCATION

B.S Computer Science

University of Oradea

2012 - 2016

GPA

3.7 / 4.0

EXPERIENCE

UI Developer

Freelance work

📅 2015 - 2017

- Migrated a client's WordPress site from an old and outdated template to a new responsive template.
- Defined the overall user experience, layout, wireframes, and sitemaps for an enterprise-level site featuring over 75,000 pages and over 40 individual templates.
- Developed HTML prototypes for an enterprise-level site featuring over 40 unique templates using a reusable kit that includes files based on atomic design principles.
- Developed an HTML-based style guide broken down into individual components featuring visual examples as well as code snippets that could be previewed and duplicated easily in templates.
